

Game Gear SMS 2nd controller built in

GAME GEAR CONSOLE · TUESDAY, AUGUST 1, 2017 · 1 MINUTE · 17 Reads

Below is information for installing a second GGNES so you can play SMS games with two players on your Game Gear. Of course you also need the SMS to GG adapter such as Gear Master.

Don't use the 5V Power from the ext port pins shown above. You'll want to pull your 5V from a closer capacitor or from the main 5V going to the board. Here is that pinout

Power Pinout on main board

Now you'll have to make the choice, do you want the second player to be able to have start or reset button as the first player does? If you do, you can solder those pins to the same pins as the first player GGNES, if you don't then leave them unattached.
